

**LINDNER ANIMAL HOSPITAL
ELECTIVE SURGERY RELEASE FORM**

Animal: _____ Owner: _____

Animal's Age: _____ Surgery: SPAY/NEUTER

Phone number where you can be reached today : _____

Your animal is being scheduled for surgery/anesthesia. By signing below you acknowledge consent for the necessary procedures to be performed.

_____ 1. **Sevoflurane Gas:** We recommend sevoflurane gas anesthesia. This anesthesia has a smoother induction and a smoother recovery. This is not optional for smaller and/or older at risk animals. The additional cost is \$32.00.

_____ 2. **Heartworm Occults/Ehrlichia/Lymes/Anaplasma Test:** This is mandatory for any patient without a negative heartworm test in the past 12 months unless animal is less than 1 year of age. The additional cost of this test is \$36.00.

_____ 3. **FELV/FIV Test:** (For CATS only) This test is for Feline Leukemia and Feline Immunodeficiency Virus (like AIDS). We recommend this as these are both life-threatening illnesses. The additional cost for this test is \$48.00.

_____ 4. **Pain Relievers:** After surgery your animal will experience pain -- just like in humans. The additional cost for pain relievers are \$32.00.

_____ 5. **Update Vaccinations:** *All animals have to be current on Rabies.* We also recommend DHLPP (distemper/parvo combo), BORDETELLA (kennel cough), and CANINE INFLUENZA vaccinations for dogs and FVRCP-L for cats.

_____ 6. **Pre-Anesthesia Profile:** We recommend a blood workup be done before surgery, especially on patients who are older or who have known health problems. This profile lets us know if there are any health problems we should be aware of and if all of the major organs are in good health. This is mandatory in patients 8 years old or older. The additional cost is \$120.00.

_____ 7. **Microchip:** Protect your pet with permanent identification. This is done intramuscular. We recommend doing this procedure under sedation. The additional cost is \$52.00.
