

# PENNYOZINGAPHOTOGRAPHY

NEWBORN, BABY, ONE YEAR, CHILD AND FAMILY SESSIONS

## NEWBORN SESSIONS

It's best to do newborn sessions between the first 7 - 21 days after birth. Typically newborn sessions are done in the studio but can be done in the clients home depending on location\*. Typically newborn sessions take anywhere from 45 minutes up until an hour and a half. Oftentimes newborn sessions will not have quite the image output that other portrait sessions have, especially if baby isn't relaxed or a lot of time is spent tending to the baby. You should receive images within 4-10 days of session.

The more full, sleepy and relaxed the baby is for the session the better. But, sometimes this isn't always the case and a good portion of the session may be spent calming and feeding the baby. It helps if there are no more than one or two adults present at the session besides the photographer.

For studio sessions, backdrops, lighting, furniture, fabrics and blankets and props such as baskets, crates, beanbags etc...are provided. Client is responsible for bringing any clothing and accessories for the new baby. About 75% of the session will be "naked baby" shots or baby in a diaper cover or wrapped in fabric. Most clients do not feel the need to use more than one or two outfits for the new baby. Hats, headbands, booties, special quilts and other special items are good ideas to have at the session if you have them and want to use them. However, sometimes we don't always get to everything depending on how things fit or the mood of the baby.

## BABY AND ONE YEAR SESSIONS

Sessions for babies up to a year, including first birthdays, are done in either studio setting or outdoors. Typically these sessions do best at about 45 minutes. After that, babies tend to tire of the session.

For studio sessions, backdrops, lighting, furniture, fabrics and blankets and props such as baskets, crates, beanbags etc...are provided. Client is responsible for bringing any clothing and accessories for the baby. Most clients do not feel the need to use more than one or two outfits for the baby. Hats, headbands, and other special items are good ideas to have at the session if you have them and want to use them.

For babies under 6 months- if the babies aren't sitting up fully yet, its recommended to wait until they are sitting. There is more variety of shots that can be done.

Many clients bring cake for one year old shoots. If bringing a cake, keep colors to blues, pinks, cremes etc... chocolate or dark colored cakes don't photograph as well.

You should receive your images within 4-10 days of session.

## CHILDREN AND FAMILY SESSIONS

For sessions with just children, outdoor locations are preferred but studio is available. For full family sessions, outdoor locations are the main option as studio sessions can get too cramped with larger groups. Family sessions typically last from 30 minutes up to about an hour and 15 minutes. For sessions with more than 5 people, there is an additional per person fee of \$10 per person. Pets are welcome.

Wear what you like and what represents you and your family's personality. There is no need to overly match all the outfits, but complimentary colors and patterns do work best. Also, stay away from too much pure white as it is sometimes hard to expose for and can often wash people out.

You should receive images within 4-10 days of session.
